Further Mathematics Bridging Work

Bridging Work for Further Mathematicians

We are looking forward to getting started on the Further Maths A-Level with you in September, a challenging and rewarding course we are sure you are going to love. We expect a real passion for maths from our further maths students and hopefully you have some aspiration to go on to do something mathematical in the future.

Over the summer we hope you are working through the Maths Bridging work we have set on the website. I would also encourage you to take a look at the following two links.

The first link is: https://amsp.org.uk/resource/gcse-alevel-transition-resources

Each section is vital for your maths and further maths journey so it's worthwhile completing aspects of these to make sure your knowledge is where it needs to be. You may want to skip through some of the easier starting points, and get onto the trickier activities in each section.

The second link is: Edexcel Further Maths (AS) Core Pure - YouTube

This follows our syllabus and has a short video on each of the topics we will cover in year one of Core Pure. Some you may recognise from what you have covered before but others may be brand new. We will go through each of these in lessons so we don't expect you to know everything straight away. We will recommend you review these as part of your revision to ensure you have a good understanding of each section.

We hope that you enjoy this and that you are looking forward to working with us in September.

Any problems or queries don't hesitate to email me on the address below.
